

Lars Rank Keramik

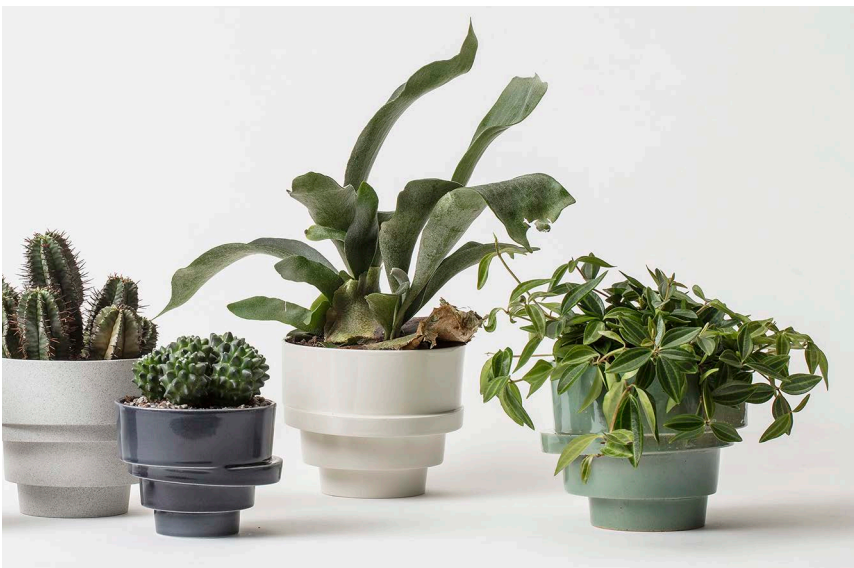

A ceramic studio based in Copenhagen

About Lars Rank Keramik

Lars Rank graduated from the Jutland Art Academy in 2001 and has worked on numerous art and design projects - always with ceramics playing a key role. Since 2004 he has specialised in designing and manufacturing high-quality ceramic products for the home.

Lars Rank's work is rooted in the Scandinavian design tradition. All his products are hand-cast in porcelain at his studio in Copenhagen, a process that demands both precision and dedication. Pieces often have clean forms accentuated with startling decoration. The design process is an interaction between the ceramic material and the idea. It's not about controlling the ceramic material but about providing a framework in which it can flourish. Small variations make all Lars Rank products unique.

Lars Rank's collection contains of a range of products like: Tableware, vases, lamps, candleholders and flowerpots.

Green Moss Tableware

The Green Moss Series consist of 11 pieces: a sugar bowl, a milk jug, a cup, a side plate, a dinner plate, two serving platters, a teapot and three bowls in different sizes. The plate also serves as a lid for the largest bowl. All pieces are decorated with green arches hanging from the top edge of each piece - like moss growing on a large rock. They are cast in a light brown stoneware clay containing dark brown specks that gives the clay a coarse expression. The design language is simple and clean, and lends itself to many functions, while the decoration is more free and unique to each piece. The glaze is tactile with a deep green colour and it gives a darker tone brown to the clay where clay and glaze meets. Which gives an extra finesse to the decoration.

Blue Hills Tableware

The Blue Hills Series consist of 11 pieces: a sugar bowl, a milk jug, a cup, a side plate, a dinner plate, two serving platters, a teapot, and three bowls in different sizes. The side plate also serves as a lid for the largest bowl. All pieces are decorated with blue arches that look like hilly landscapes. They are cast in delicate white porcelain, and decorated with coarse dark brown stoneware slip. The design language is simple and clean, and lends itself to many functions, while the decoration is more free and unique to each piece. The glaze is tactile with a deep blue colour that emerges from the dark brown slip, reminding us of the ceramics made in the 60s and 70s. At the same time the tableware as a whole has a contemporary expression.

Dots Tableware

Dots are a tableware collection made with minimalist design and reference to the cylinder form. It consists of 12 pieces. Dots are available in four different colours: light blue, light green, light grey and white. There are dots in different sizes and colours in the bottom of every piece. All pieces are hand decorated with a unique colour combination and form. The 4 colours available in Dots tableware can easily be combined and matched with other pieces because the decorative colours are repeated. In that way you can put together an unique tableware sets as you choose the way to build your Dots.

The Stacking Series

The stacking series consists of vases, tealight holders, lamps, flowerpots and cups. The products are made of cylindrical rings, which are stacked and staggered horizontally. The pure form of the cylinder is challenged by the precarious stacking and gives life to each piece, between order and chaos. The delicate porcelain cylinder combined with the eccentrically playful stacking creates a sculptural result.

The vase comes in three sizes and five colours. - The tealight holder is cast in the very transparent Parian porcelain. When lit up it glows in a warm orange colour and the displacements gives beautiful light and shadow effects. - The lamp comes in four colours and have a silk matt surface. The lamp is sold with a porcelain socket (E14) og three meters fabric cord. The cord is available in four colours. - The flowerpot is available in two sizes five colours, three glazed and two in raw clay. It comes with a saucer. It is made in high-fired clay and is waterproof, but it is not suitable for outdoor use in frost weather. - The cup is available in three sizes with different stackings and comes in four colours.

Christmas Ornaments

Stars, frost flowers, hearts, pine trees and angels made in porcelain to hang on the Christmas tree, in a window or where you want to decorated for Christmas.

The expression of the Christmas ornaments is simple and designed to fit into a modern home. Not two pieces of ornament look the same because they are all handmade. Therefore they have their own individual expression and the size of each piece ranges between 8 and 13 cm in height. They are sold in a delicious gift box of light brown carton containing 5 pieces of ornament with matching ribbon.

You Little Teapot

You Little Teapot is a collaboration between Lars Rank Keramik and writer and artist Tomas Lagermand Lundme. A series of products with handwritten statements - subtle and funny messages that makes them obvious as a gift idea. A vase for a single flower or a candleholder, this product can be used as both. It comes with 16 different statements and has a height of 19 cm. The cups come in 13 different designs with statements and drawings and can contain 25 ml. Both products are made of porcelain.

Du er noget helt særligt for mig

Øv jeg er ikke en Lyngby-vase

Om natten bliver jeg bange for om...

Jeg blomstrer på livet løs

Du er mit livs lys

Tak fordi du er dejlig

I am so in bloom

Det bedste er at være gift med hinanden

You Little Teapot

Tak fordi du er dig

Jeg er sådan en som brænder mit lys...

You are the light of my life

Tak fordi du har tænkt på mig

I am on fire

Jeg er fyr og flamme

Under træerne finder vi hinanden igen

Jeg har tændt mig selv

Tak fordi du har tændt mig

Nu lyser jeg for dig

The light isn't worth the candle
